OBJECTIVE

Inspired by DIF's ongoing commitment to reinstate its proactiveness in diversity, I am aspiring to represent you all on the Steering Committee in 2021-2022

QUALITIES

Energetic
Analytical

Assertive
Result-Oriented

GLOBAL BUSINESS COORDINATOR

Finema Co., Ltd.

WHY ME?

Hosting DIF-APAC and setting up DIF-Africa not only offered me a platform to build my communication and organizational skills, but also led to strong relationship with the

community. It is with this attachment that I was inspired to represent Asia-Pacific and Africa at large in a more active role on the DIF Steering Committee. My aim is to voice the concerns of the community and fully represent these two regions of the world. This shall not only reinstate DIF's ability to nurture diversity in geographical distribution and culture but also offer a sense of enrichment.

- ▶ I am a highly self-motivated individual who will not stop at anything until the responsibility at hand is done.
- ▶ I come along with excellent management and capacity building skills, exceptional ability to multi-task, compelling leadership skills, and high tolerance to stress. I am a flexible team player and, above all, very self-driven.

Experience Pertinent to the Role

- ▶ I was an analyst at an investment banking firm, overseeing multiple facets of the business, e.g., strategies, partnerships, budgets, and commercial models. This has given me all-encompassing and strategic thinking that would become useful for how to make DIF sustainable.
- ▶ I am actively and inactively (i.e., at the observer level) involved with several initiatives that apply SSI, e.g., CCI, ToIP, and GHPC.
- ▶ Over time, I have developed successful methods in working with local regulators to endorse VCs. My experience would assist DIF in their effort to collaborate with regulators in other countries, especially those in APAC and Africa.
- ▶ At Finema, I am involved in business development, marketing, project management, team building, communication, customer relation, community coordination, and global outreach.

Education

Master of Science in Food Biotechnology

Outside of Work

I love volunteering, reading, adventure, counseling, and learning new skills.
